

Department: Sales
Closing Date: Resumes will be reviewed as received; interviews scheduled accordingly.
Work Location: Switzerland – Basel, Geneva, or Lausanne (home office set-up)

**Applicants must have valid Swiss work authorization; the ability to travel cross-border (between European countries and to North America) is also required.*

Role As a key member of the Sales Team, the Field Applications Specialist (FAS) will provide technical expertise when building the customer relationship, helping to move prospects through the sales cycle to implementation. The successful candidate will work closely with customers to identify and address requirements. Drawing on their in-depth technical knowledge of GenoLogics' software solutions and scientific workflows, the FAS is responsible for customer solution definition and acceptance.

The successful candidate will have excellent customer facing skills, combined with a strong technical background, software demonstration skills, and knowledge of the Life Sciences industry. Applicants must thrive in a high pressure, competitive and dynamic environment with an overwhelming drive to succeed. The ability to build and manage relationships from a distance as a remote employee will be a critical success factor. This will require pro-active, ongoing communication.

- Responsibilities**
- Achieve expert level knowledge and understanding of GenoLogics' software solutions, including technical architecture and end-user application
 - Gather and analyze customer requirements to recommend appropriate long-term solutions
 - Develop customer specific workflow configurations and instrumentation integrations leading to a documented solution definition
 - Develop and deliver custom software demonstrations (on-site and remote) targeted to meet individual customer requirements as per operating environment and market segment
 - Contribute to the development of sales quotations, proposals, and implementation plans
 - Represent GenoLogics at trade shows and other industry events
 - Work with internal stakeholders to answer/resolve any technical questions/issues faced by prospective customers
 - Provide feedback to Product Management regarding general customer requirements for future product releases
 - Ensure a seamless hand-off for successful implementation management following customer commitment
 - Deliver post-sales customer training and education as required
 - Provide support for the development of marketing messaging and collateral

- Requirements**
- Required**
- Strong written and verbal communication skills, ability to present complex technical information to various audiences to promote learning and knowledge transfer
 - Capable of developing and delivering world class software demonstrations
 - Passionate about technology, keen interest in learning about life sciences and the sales cycle
 - Strong commitment to personal excellence, self-motivated, self-sufficient and resourceful
 - Excellent project management skills, ability to balance multiple priorities in a dynamic work environment involving multiple stakeholders
 - A team player with a "can do" attitude, strong customer service orientation
 - Capable problem solver that develops effective solutions for complex problems
 - Working knowledge of scripting, database and LINUX operating systems
 - Strong knowledge of XML, CF21 Part 11, HIPAA preferred but not required
 - Minimum 3 years experience in a similar field based technical support and/or applications engineering position
 - Proven knowledge and understanding of Linux/Unix and/or Windows environments
 - Knowledge and understanding of database report generation and scripting
 - Experience deploying enterprise level software solutions requiring systems configuration
 - Bachelor's Degree in Computer Science, Bioinformatics, Biology, or related discipline
 - This position requires extensive travel (up to 50%) primarily in Europe
- Desirable**
- Understanding of Data Management or Lab Information Systems
 - Knowledge and understanding of the life science, biotech and/or pharma industries

**The GenoLogics
Philosophy**

The GenoLogics philosophy is that to build a great company, you must first and foremost be a great employer. This means creating a workplace that is both inspiring and rewarding – one with shared purpose and meaning. GenoLogics produces more than world-class software; we develop solutions to help advance the early detection, prevention and treatment of diseases such as cancer. To achieve this vision, we've created a flat, boundaryless team environment where communication is open and decision-making is transparent. It is the creativity, energy and savvy of our people that enables our success as an organization.

GenoLogics isn't a job – it's an experience. What makes the *GenoLogics Experience* unique is the opportunity to:

- Impact the success of a dynamic company
- Learn and grow through challenging work and diverse professional development
- Surround yourself with bright, talented people selected for who they are, not only what they can do
- Enjoy a casual, campus-like atmosphere where fun and flexibility are a way of life

**Application
Information**

If you are interested in applying for this position, please email your resume and cover letter (one word or pdf attachment) to careers@genologics.com.

GenoLogics offers an attractive total compensation package including stock options. We thank everyone for their interest in this position; only short-listed applicants will be contacted. A hiring decision will be made as soon as we find the perfect candidate. Interviewing will be ongoing until such time.

GenoLogics is well positioned for success within its marketplace. The company is experiencing rapid growth and expects to fill a number of outstanding professional positions over the coming year. GenoLogics is this year's proud recipient of the Human Resources Excellence Award, as awarded by the Vancouver Island Technology Association (VIATeC).
